

BIKE RACKS

# Saddle Post<sup>®</sup>

ALL ALUMINUM EVENT BIKE RACKS

Saddle Post is a portable, A-frame bike rack for parking and organization. It can be assembled in seconds. Bikes are stationed by placing seat saddles on the horizontal post supported by two fold-out A-frames. The lightweight design, canvas carrier, and simple pop-up assembly make it extra convenient for teams to manage bike parking on the spot. Saddle Post can be taken and set up anywhere, making it perfect for events; group rides, races, triathlon transition zones, and valet parking.
